

CH 27 RECONSTRUCTION PROJECT UPDATE

NOTICE

A significant road project improvement on Scott County Highway (CH) 27 will begin August 2nd. The project will construct and extend the 4-lane divided roadway on CH 27 from CH 44 south to CH 21. Next week, this section of roadway will be restricted for one full week to a single lane with flagging operations during working hours to perform tree clearing and utility relocations. Additional periodic lane closures with flagging operations will be in effect until a 21-day full closure of CH 27 takes place later in September to construct a storm water culvert crossing near Creekwood Road. The balance of the project will continue next year, with a planned completion date in October 2022. For further information and updates:
